

SUMMARY

Frontend developer with experience working remotely with teams in Indonesia, Japan and China. I love the 'aha' moments in coding and enjoy building clean, user-friendly, and accessible web and mobile applications. Skilled at working across teams, communicating clearly, and taking ownership from concept to delivery. Currently seeking a full-time role where I can grow and contribute to meaningful, user-centered products.

SKILLS

TypeScript | JavaScript | Java | Python | Swift | SQL | HTML | CSS | React | React Native | Next.js
Node.js | Tailwind | GraphQL | PostgreSQL | MongoDB | Firebase | Docker | CI/CD | AWS | RESTful API

WORK EXPERIENCE

🏠 Four Wukong

Shenzhen, Sep 2020 – Jul 2022

Software Engineer

- Co-led the development and launch of GROSIRAJA, a mobile application built with **React Native** (iOS & **Android**) that successfully grew to **20,000+ users** in the Indonesian market.
- Designed system architecture and workflows for financial and operational management.
- Planned and built the client-facing web version of GROSIRAJA using **React** and **CSS**.

🌀 Fuji Xerox

Shenzhen, Jul 2019 – Jul 2020

Project Manager

- Managed timelines for the design and prototyping of new printer molds.
- Oversaw mold assembly and quality testing processes in both China and Japan.

EDUCATION

🏫 Langara College

Vancouver, Sep 2023 – April 2025

Post-degree Diploma in Web and Mobile App Development

🏫 Harbin Institute of Technology

Harbin, Sep 2015 – Jun 2019

BEng in Materials Science and Engineering

PROJECTS

🚀 Evalo 🔗

- An iOS mobile app that streamlines report creation through voice-to-text transcription, **AI-powered** content summarization. Enabled users to export reports in PDF and Excel formats.
- Built with **React Native**, **GraphQL** (Apollo Client + gqlgen), and **Go**, with microservices deployed via **Docker** and infrastructure powered by **AWS**. Integrated **Gotenberg** for PDF generation from document formats.

🛡️ Helpmet 🔗

- An injury-tracking web platform enabling real-time injury reporting, data-driven analytics, and customizable safety alerts.
- Built with **React**, **Node.js** (Express), and **MongoDB**, with **Chart.js** used for interactive data visualization and analytics..
